# 1. INTRODUCTION

## a. Project Overview

TEAM ID : PNT2022TMID15737

FACULTY MENTOR : P ILAMPIRAY

### **Skills Required:**

IBM Cloud, HTML, Javascript, IBM  
Cloud Object Storage, Python- Flask,  
Kubernetes, Docker, IBM DB2, IBM  
Container Registry

## 1. INTRODUCTION

### a. Project Overview

This project is based on expense tracking. This project aims to create an easy, faster and smooth cloud application. For better expense tracking we developed our project that will help the users a lot. Most of the people cannot track their expenses and income leading to facing money crisis, so this application can help people to track their expense day to day and make life stress free. Money is the most valuable portion of our daily life and without money we will not last one day on earth. So using the daily expense tracker application is important to lead a happy family. It helps the user to avoid unexpected expenses and bad financial situations. It will save time and provide a responsible lifestyle.

### b. Purpose

Personal finance management is an important part of people's lives. However, everyone does not have the knowledge or time to manage their finances in a proper manner. And, even if a person has time and knowledge, they do not bother with tracking their expenses as they find it tedious and time-consuming. Now, you don't have to worry about managing your expenses, as you can get access to an expense tracker that will help in the active management of your finances. Also known as expense manager and money manager, an expense tracker is a software

or application that helps to keep an accurate record of your money inflow and outflow. Many people in India live on a fixed income, and they find that towards the end of the month they don't have sufficient money to meet their needs. While this problem can arise due to low salary, invariably it is due to poor money management skills.

People tend to overspend without realizing, and this can prove to be disastrous. Using a daily expense manager can help you keep track of how much you spend every day and on what. At the end of the month, you will have a clear picture where your money is going. This is one of the best ways to get your expenses under control and bring some semblance of order to your finances. Today, there are several expense manager applications in the market. Some are paid managers while others are free. Even banks like ICICI offer their customers expense tracker to help them out. Before you decide to go in for a money manager, it is important to decide the type you want.

## **2. LITERATURE SURVEY**

### **a. Existing problem**

In a study conducted by Forrester in 2016 surveying small and medium businesses (SMBs) across the world, 56% of companies reported expense management as being the biggest challenge for their finance departments.

In another survey conducted by Levvel Research in 2018 in North America, respondents reported the following pain points in expense management before adopting automation:

- i. Manual entry and routing of expense reports (62%)
- ii. Lack of visibility into spend data (42%)
- iii. Inability to enforce travel policies (29%)
- iv. Lost expense reports (24%)
- v. Lengthy expense approval system and reimbursement cycles (23%)

## 3. Problem Statement Definition

<b>I am</b>	<small>Describe customer with 3-4 key characteristics - who are they?</small>	Describe the customer and their attributes here
<b>I'm trying to</b>	<small>List their outcome or "job" the care about - what are they trying to achieve?</small>	List the thing they are trying to achieve here
<b>but</b>	<small>Describe what problems or barriers stand in the way - what bothers them most?</small>	Describe the problems or barriers that get in the way here
<b>because</b>	<small>Enter the "root cause" of why the problem or barrier exists - what needs to be solved?</small>	Describe the reason the problems or barriers exist
<b>which makes me feel</b>	<small>Describe the emotions from the customer's point of view - how does it impact them emotionally?</small>	Describe the emotions the result from experiencing the problems or barriers

### Personal Expense Tracker Application:

<small>I am</small> User	<small>I'm trying to</small> Track my Expenses	<small>but</small> can't able to predict expense by my own	<small>Because</small> lack of guidance	<small>which makes me feel</small> more Stressed
-----------------------------	---	---	--	---

### Customer Problem Statement :

A well-articulated customer problem statement allows us to find the ideal solution for the challenges our customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Student	Manage my expenses	It is very difficult	There is no proper app to warn me regarding my expense	Frustrated
PS-2	IT employee	Reduce my expense	I am not able to keep track of my expense	I cant see the app which satisfies my needs	Annoyed

## 1. IDEATION & PROPOSED SOLUTION

### a. Empathy Map Canvas

### B. Ideation & Brainstorming

### Step-1: Team Gathering, Collaboration and Select the Problem Statement

# Brainstorm & ideaprioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- 10 minutes to prepare
- 1 hour to collaborate
- 2-8 people recommended

## Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

- 10 minutes

### Team gathering

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

### Set the goal

Think about the problem you'll be focusing on solving in the brainstorming session.

### Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

Open article →

## Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

- 5 minutes

PROBLEM

How might we track personal expenses?

### Key rules of brainstorming

To run an smooth and productive session

- Stay in topic.
- Encourage wild ideas.
- Defer judgment.
- Listen to others.
- Go for volume.
- If possible, be visual.

## Step-2: Brainstorm, Idea Listing and Grouping

### Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

Karinaya N

Day to Day  
reminder  
about account  
balance via mail

Afra Thahseen J

If the user  
spent high  
, then send  
mail

Abdul Waseem  
Nihhaal KW

If they logged  
in to the web  
app, we can  
send some  
alert

Jaysri PS

Sending  
mail when  
exceeds  
the limit

### Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

Frequent  
monitoring  
on balance  
by user.

If they logged  
in to the web  
app, we can  
send some  
alert

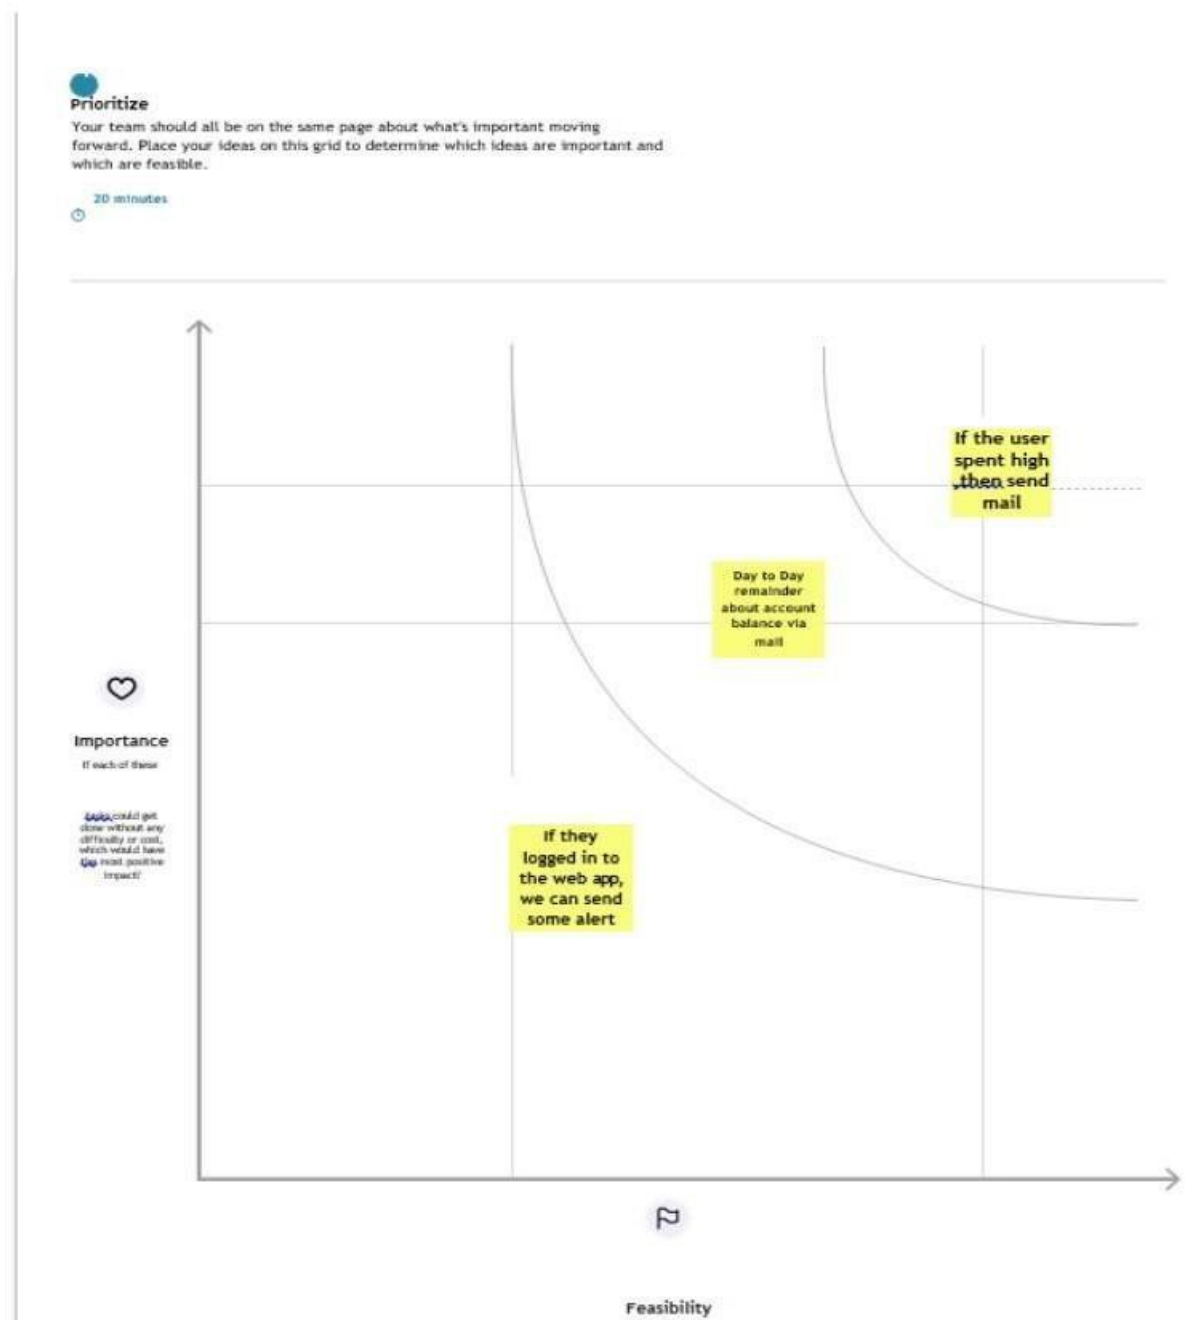

Sending  
mail when  
exceeds  
the limit

If the user  
spent high  
, then send  
mail

Day to Day  
reminder  
about account  
balance via mail

Sending mail  
after exceeds  
the limit is  
useless

### Step-3: Idea Prioritization

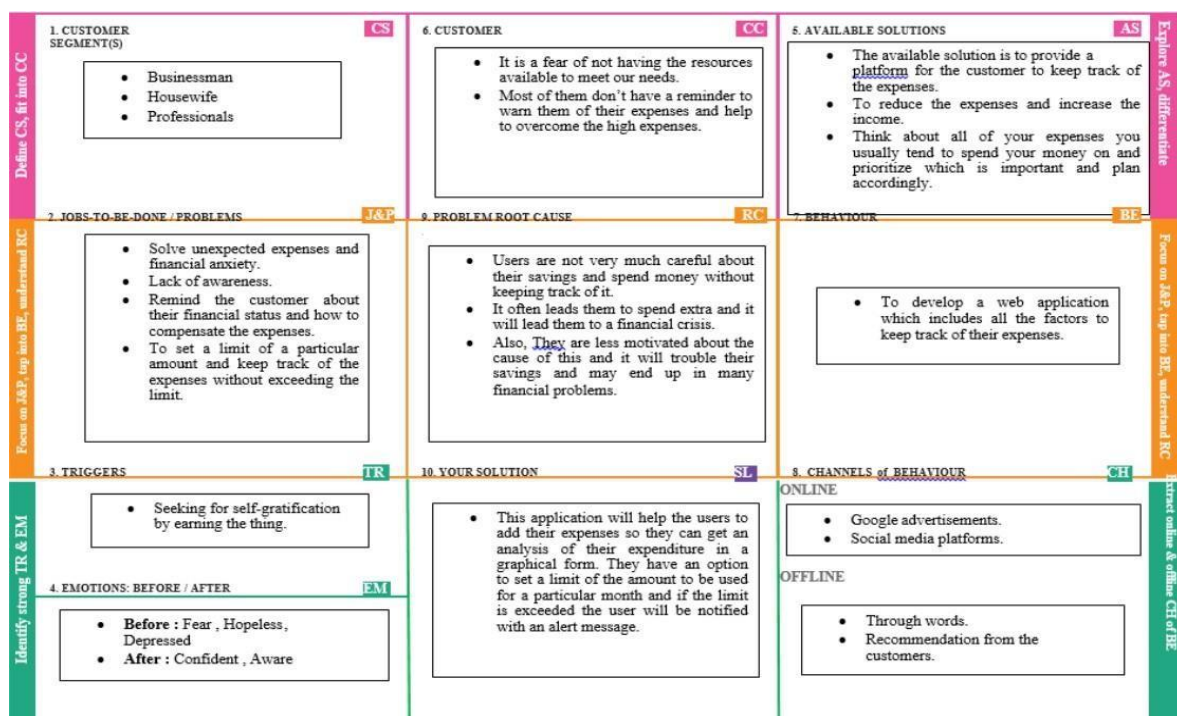

c.Proposed Solution

S.No.	Parameter	Description

1.	Problem Statement (Problem to be solved)	<p>Keeping Proper track of our daily expenses is becoming challenging in today's world. Without the proper money management knowledge people overspend on their wants instead of focusing on their needs.</p> <p>Especially when using online applications for purchasing their requirements consumers tend to over spend. This problem leads to improper distribution of their daily expenses. Without proper knowledge on managing money poor are becoming poorer and rich are becoming richer.</p>
2.	Idea / Solution description	<p>An attempt to develop an app to manage our daily expenses and give us insights on managing our money would be a good idea. This app will be able to track expenses on various online platforms and apps. The app can help with proper budgeting and give alerts when the user over spends or crosses the limit previously set by them. This will lead to proper spending habits and make them knowledgeable about money management. IBM cloud can be used to handle the data safely.</p>
3.	Novelty / Uniqueness	<p>The speciality for the app will be the data security with IBM cloud being used for data storage and this app genuinely helps with the money management. The proper and personalized budgeting of the user's money leads them to trust the app and they wouldn't have to worry about their expenditure on unnecessary things.</p>
4.	Social Impact / Customer Satisfaction	<p>People using the app will be becoming better at their spending habits and will be able to save more than their peers who are not using the app. This application aims to improve the users' savings sustainably and steadily which leads them to trust the app without worrying about their money.</p>

5.	Business Model (Revenue Model)	This application leads to a business model, the user can be suggested the right products to buy based on their budget and this can lead to targeted business approaching the right consumers. The model leads to systematic and structured expenses of the user and also leads to predictive analysis of the future expenses of the consumer. This model makes the user more careful with expenses as they are provided with the money management insights.
6.	Scalability of the Solution	This application can be created as a multi user model nationwide. The model can also be modified based on the country's law on applications and data security which leads to international implementation of this application by maintaining proper gateway rules. This app when developed for multiple nations can be modified to their requirements. The app can also be modified for a particular group of people or organization.

#### d. Problem Solution fit

## 4. REQUIREMENT ANALYSIS

## a. Functional requirements

FR No.	Functional Requirement	Description
FR-1	<b>Register</b>	Registration is the process of the user to complete the application's form. Certain details must be submitted such as e-mail address, password, and password confirmation. The user is identified using these details.
FR-2	<b>Login</b>	The login screen is used to verify the identity of the user. The account can be accessed using the user's registered email address and password.
FR-3	<b>Categories</b>	On the main page, we can see overall revenue and spending, as well as the balance remaining after expenditure, as well as the user's entire categories namely Entertainment, Cloth, Food and Drinks, Health and Fitness and so on.
FR-4	<b>Update Daily Expensive</b>	The user can upload the daily expensive details what they are spending on each day. The details such as cloth, entertainment, food, health etc.,

FR-5	<b>View Expensive Chart</b>	This module used to see a pictorial depiction of all details in the form of a pie chart, where each slice of the pie chart represents that the viewer to gain an approximatention of which category has the highest expenses.
NFR-6	<b>Set Alert</b>	When a user attempts to spend more than the pre-defined amount limit, the app will automatically send an alert if the threshold amount they selected for an alert is exceeded.

**b. Non-Functional requirements**

<b>NFR No.</b>	<b>Non-Functional Requirement</b>	<b>Description</b>
NFR-1	<b>Usability</b>	The system shall allow the users to access the system with pc using web application. The system uses a web application as an interface. The system is user friendly which makes the system easy.
NFR-2	<b>Security</b>	A security requirement is a statement of needed security functionality that ensures one of many different security properties of software is being satisfied.

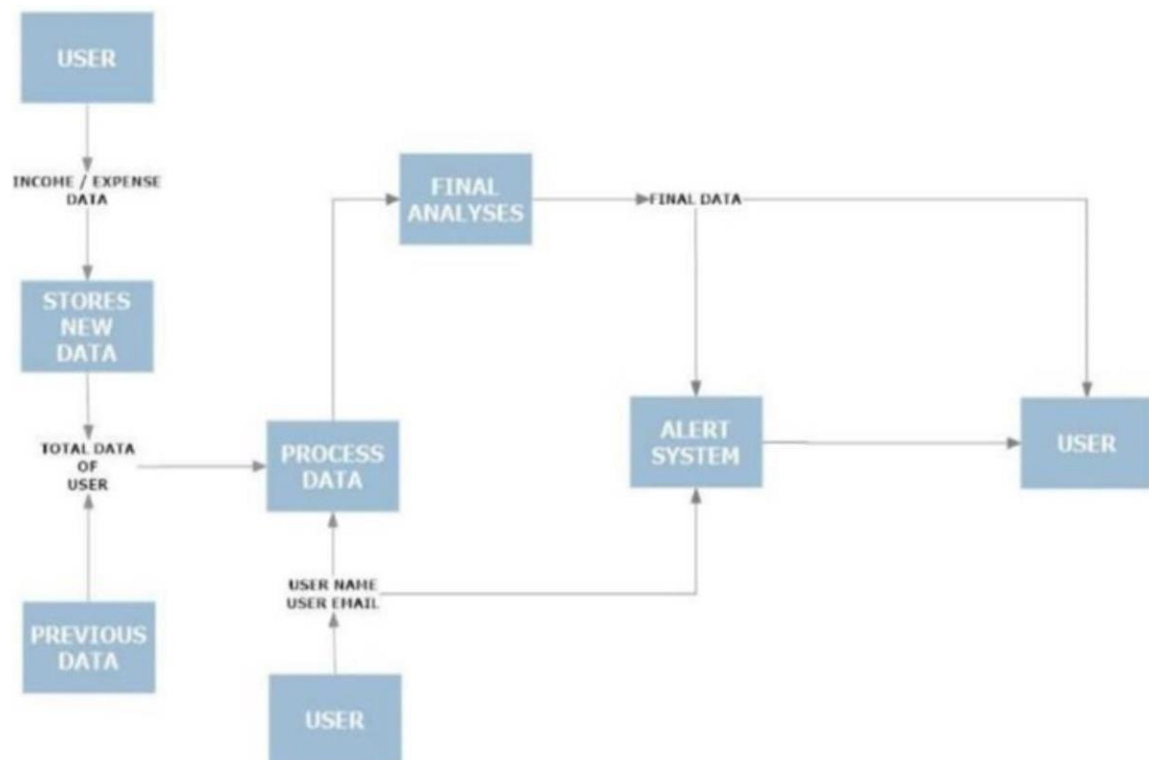

NFR-3	<b>Reliability</b>	<p>he system has to be 100% reliable due to the importance of data and the damages that can be caused by incorrect or incomplete data.</p> <p>The system will run 7 days a week.</p> <p>24 hours a day.</p>
NFR-4	<b>Performance</b>	<p>The information is refreshed depending upon whether some updates have occurred or not in the application. The system shall respond to the member in not less than two seconds from the time of the request submittal. The system shall be allowed to take more time when doing large processing jobs. Responses to view information shall take no longer than 5 seconds to appear on the screen.</p>
NFR-5	<b>Availability</b>	<p>The system is available 100% for the user and is used 24 hrs a day and 365 days a year. The system shall be operational 24 hours a day and 7 days a week.</p>
NFR-6	<b>Scalability</b>	<p>Scalability is the measure of a system's ability to increase or decrease in performance and cost in response to changes in application and system processing demands.</p>

## 5. PROJECT DESIGN

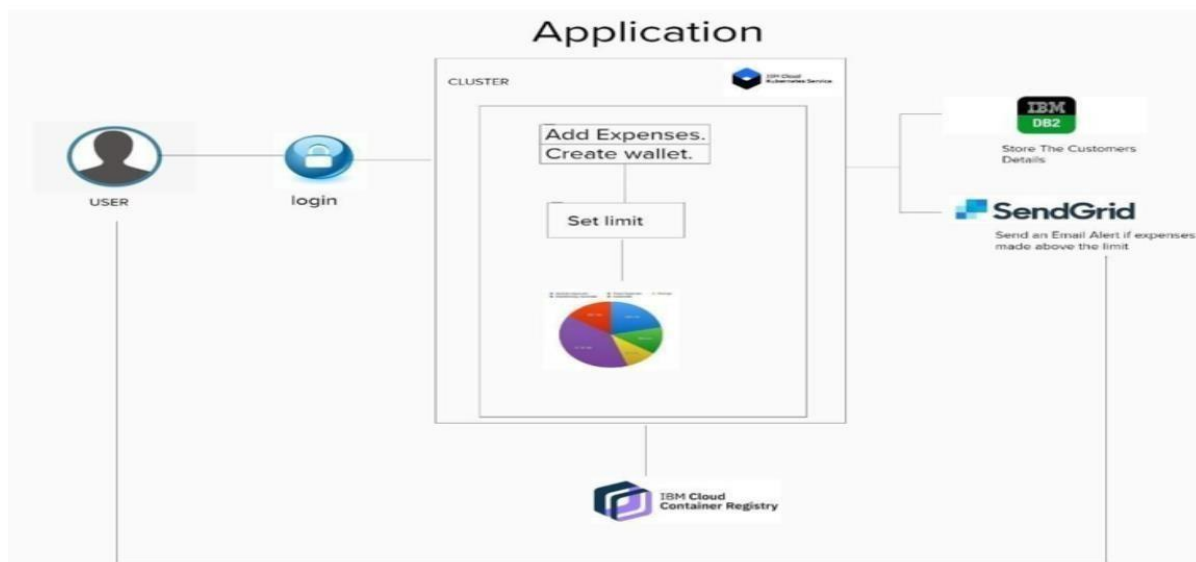

### a. Data Flow Diagrams

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

## ii. Board

The screenshot displays the Jira Software interface for the 'Personal Expense Tracker Application' (PETA) project. The main view is 'PETA Sprint 1', which is a Kanban board. The board is organized into three columns: 'TO DO 3 ISSUES', 'IN PROGRESS 1 ISSUE', and 'DONE'. Each column contains issue cards. For example, in the 'TO DO' column, there are three cards: 'As a user, I will receive confirmation email once I have registered for the application' (labeled 'REGISTRATION', PETA-2), 'As a user, I can log into the application by entering email & password' (labeled 'LOGIN', PETA-4), and 'As a registered user, it takes the user to the dashboard' (labeled 'DASHBOARD', PETA-5). The 'IN PROGRESS' column has one card: 'As a user, I can register for the application by entering my email, password, and confirming my password.' (labeled 'REGISTRATION', PETA-1). The 'DONE' column is currently empty. A sidebar on the left provides navigation options such as 'Roadmap', 'Backlog', 'Code', and 'Project settings'. The top navigation bar includes various project links and a search bar.

```

**8. TESTING:****a.TestCases:**

Test case ID	Feature Type	Component	Test Scenario	Steps To Execute	Test Data	Expected Result	Actual Result	Status	Comments	BUG ID	Executed By
LoginPage_TC_001	Functional	Home Page	Verify user is able to see the Login/Signup popup when user clicked on My account button	1.Go to website 2. Enter Valid username and password	Username: Kavi password: 123456	Login/Signup popup should display	Working as expected	Pass	-		Kavinaya
LoginPage_TC_002	Functional	Home Page	Verify that the error message is displayed when the user enters the wrong credentials	1.Go to website 2. Enter Invalid username and password	Username: XXXXX Password: 12345	Error message should displayed	Working as expected	Pass	-		Afra
LoginPage_TC_002	UI	Home Page	Verify the UI elements in Login/Signup popup	1.Go to website 2. Enter valid credentials 3. Click Login	Username: Kavi password: 123456	Application should show below UI elements: a. email text box b. password text box c. Login button with orange colour d. New customer? Create account link e. Last password? Recovery password link	Working as expected	Pass	-		Abdul Waseem
LoginPage_TC_003	Functional	Home page	Verify user is able to log into application with Valid credentials	1. Go to website 2. Enter details and click login	Username: Kavi password: 123456	User should navigate to user account homepage	Working as expected	Pass	-		Jayasri
LoginPage_TC_004	Functional	Login page	Verify user is able to log into application with Invalid credentials	1. Go to website 2. Enter details and click login	Username: Kavi password: 123456	Application should show 'Incorrect email or password ' validation message.	Working as expected	Pass	-		Afra
LoginPage_TC_004	Functional	Login page	Verify user is able to log into application with Invalid credentials	1. Go to website 2. Enter details and click login	Username: Kavi password: 123456	Application should show 'Incorrect email or password ' validation message.	Working as expected	Pass	-		Kavinaya
LoginPage_TC_005	Functional	Login page	Verify user is able to log into application with Invalid credentials	1. Go to website 2. Enter details and click login	Username: Kavi password: 123456	Application should show 'Incorrect email or password ' validation message.	Working as expected	Pass	-		Abdul Waseem
AddExpensePage_TC_006	Functional	Add Expense page	Verify whether user is able to add expense or not	1. Add date, expense name and other details 2. Check if the expense gets added	add rent = 6000	Application adds expenses	Working as expected	Pass	-		Jayasri

**b. User Acceptance Testing**

## 1. Defect Analysis

This report shows the number of resolved or closed bugs at each severity level, and how they were resolved

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	10	4	2	8	15
Duplicate	1	0	3	0	4
External	2	3	0	1	6
Fixed	9	2	4	11	20
Not Reproduced	0	0	1	0	1
Skipped	0	0	1	1	2
Won't Fix	0	5	0	1	8
Totals	22	14	11	22	51

## 2. Test Case Analysis

This report shows the number of test cases that have passed, failed, and untested

Section	Total Cases	Not Tested	Fail	Pass
Interface	7	0	0	7
Login	20	0	0	20
Logout	2	0	0	2
Limit	3	0	0	3
Signup	8	0	0	8
Final Report Output	4	0	0	4

## 9. RESULTS

### a. Performance Metrics

- i. Tracking income and expenses: Monitoring the income and tracking all expenditures (through bank accounts, mobile wallets, and credit & debit cards).
- ii. Transaction Receipts: Capture and organize your payment receipts to keep track of your expenditure.
- iii. Organizing Taxes: Import your documents to the expense tracking app, and it will streamline your income and expenses under the appropriate tax categories.
- iv. Payments & Invoices: Accept and pay from credit cards, debit cards, net banking, mobile wallets, and bank transfers, and

track the status of your invoices and bills in the mobile app itself. Also, the tracking app sends reminders for payments and automatically matches the payments with invoices.

- v. **Reports:** The expense tracking app generates and sends reports to give a detailed insight about profits, losses, budgets, income, balance sheets, etc.,
- vi. **Ecommerce integration:** Integrate your expense tracking app with your eCommerce store and track your sales through payments received via multiple payment methods.
- vii. **Vendors and Contractors:** Manage and track all the payments to the vendors and contractors added to the mobile app.
- viii. **Access control:** Increase your team productivity by providing access control to particular users through custom permissions.
- ix. **Track Projects:** Determine project profitability by tracking labor costs, payroll, expenses, etc., of your ongoing project.
- x. **Inventory tracking:** An expense tracking app can do it all. Right from tracking products or the cost of goods, sending alert notifications when the product is running out of stock or the product is not selling, to purchase orders.
- xi. **In-depth insights and analytics:** Provides in-built tools to generate reports with easy-to-understand visuals and graphics to gain insights about the performance of your business.
- xii. **Recurrent Expenses:** Rely on your budgeting app to track, streamline, and automate all the recurrent expenses and remind you on a timely basis.

## 10. ADVANTAGES & DISADVANTAGES

1. **Achieve your business goals** with a tailored mobile app that perfectly fits your business.
2. **Scale-up** at the pace your business is growing.
3. Deliver an **outstanding** customer experience through additional control over the app.
4. Control the **security** of your business and customer data
5. Open **direct marketing channels** with no extra costs with methods such as push notifications.
6. **Boost the productivity** of all the processes within the organization.
7. Increase **efficiency** and **customer satisfaction** with an app aligned to their needs.
8. **Seamlessly integrate** with existing infrastructure.

9. Ability to provide **valuable insights**.
10. Optimize sales processes to generate **more revenue** through enhanced data collection.

## **11. CONCLUSION**

From this project, we are able to manage and keep tracking the daily expenses as well as income. While making this project, we gained a lot of experience of working as a team. We discovered various predicted and unpredicted problems and we enjoyed a lot solving them as a team. We adopted things like video tutorials, text tutorials, internet and learning materials to make our project complete.

## **12. FUTURE**

The project assists well to record the income and expenses in general. However, this project has some limitations:

1. The application is unable to maintain the backup of data once it is uninstalled.
2. This application does not provide higher decision capability.

To further enhance the capability of this application, we recommend the following features to be incorporated into the system:

3. Multiple language interface.
4. Provide backup and recovery of data.
5. Provide better user interface for user.
6. Mobile apps advantage.
